

BSU - STARTER - CONNECTED CHARGER
STARTFLASH 120.24 CNT
Versatility at the heart of the workshop

A market innovation, the **STARTFLASH 120.24 CNT** is a **CONNECTED BSU - starter - charger**. Intended for all types of vehicles, from cars to heavy goods vehicles, the **STARTFLASH** is a state-of-the-art machine; as a BSU, it can perform all diagnostic tests required by vehicle manufacturers, and as a starter, it has a powerful output current of 300A. With universal connectivity, it is a versatile and unique product on the market.

CNT Connected Technology

The **STARTFLASH 120.24 CNT** is a multi-functional starter-charger, suitable for all workshop needs, offering **4 different functions**:

- **Power supply/BSU**: provides the energy required for vehicle diagnostics, in accordance with manufacturers' standards.
- **Starting**: Starts vehicles equipped with 12 and 24 V lead or lithium (LiFePO4) batteries. It has a starting output of 300A and a rapid precharge capacity (120A), providing impressive cranking performance. Powerful and capable of accelerated precharging, it can start any vehicle including bio-gas buses, trucks, or even aircraft.
- **Charging**: recharges lead or lithium (LiFePO4) starter batteries from 5 to 1200Ah. The advanced functionality of the system can help extend the life of the batteries, and also recover heavily discharged batteries (>2V) through the Auto Recovery mode.
- **Charging circuit test**: checks the condition of the battery, evaluates the vehicle's start-up performance, and the operation of the alternator.

AUTONOMOUS, INTELLIGENT & ERGONOMIC
Technology at the service of people.

With its **INVERTER** technology, the **STARTFLASH 120.24 CNT** delivers unparalleled performance. Equipped with **advanced features**, it provides superior charging and starting possibilities:

- ✓ 12 charging profiles available.
- ✓ intelligent 9-step charging curve.
- ✓ 120A precharge capacity.
- ✓ "Auto Detect" function (automatic charging).
- ✓ "Auto restart" function (memorisation of settings).
- ✓ Protection of the **on-board electronics**.
- ✓ Cable **check and calibration**.

ART. 074965

Ergonomically designed, the **STARTFLASH 120.24 CNT** can be installed on a trolley to improve mobility in the workshop.

- ✓ Durable pneumatic **wheels**
- ✓ Easy to **move around**.
- ✓ Robust and **practical**.

INTUITIVE, MODERN & MULTILINGUAL
When charging is easy.

- ✓ HMI display
- ✓ Smooth and intuitive navigation.
- ✓ Fast setup.
- ✓ Translated into **22 languages**.
